

AgileCase Documentation

Welcome to the AgileCase documentation wiki!

This is the home page for AgileCase's system documentation.

Each feature within AgileCase has been documented at length with visual guides, data and examples where appropriate to help guide you on your AgileCase setup.

Our [Getting Started Guide](#) is the best place to begin. It is split into the following sub-sections to help you get started quickly.

- [Removing the AgileCase default demo data from your account](#)
- [Creating a Business Area](#)
- [Creating a Case Type](#)
- [Setting up Case and Contact Relationships](#)
- [Setting up Custom Fields](#)
- [Creating a Case Plan](#)
- [Hiding unused information](#)
- [Whats next?](#)

We also have our [Free On-boarding](#) offer available to customers on certain packages - General AgileCase training is provided as part of the Free On-boarding service.

If you have any issues, questions or suggestions please feel free to [get in touch](#).
